

QUALITY MANUAL

QM 5-4

PLANNING

The Quality Objectives of the company are stated in our Quality Policy, QM 5-3, and all employees receive instruction on this policy at their induction or when the policy is changed. Methods of measuring our compliance with these objectives are by audits and other activities detailed of form F032

When specific objectives are required, these are addressed within the relevant procedures.

The planning of the quality management system is a complex matter that includes all parts of the manual and procedures together with the corrective and preventative measures as and when they are identified.

No changes to the quality management system are made without first being subjected to a review procedure designed to ensure that the integrity of the system is not violated.
