RESOURCE MANAGEMENT

Ref: - P 6-1 to P 6-4

There are within the company a number of occasions when the provision and management of various resources, whether in support of the quality management system or not, is addressed. The methods used to determine the resources needed and the overall management of resources is detailed in our procedures.

The provisions in respect of personnel, how they are chosen, evaluated and trained are detailed within the procedures.

Within the overall topic of resources are the provision and management of the company infrastructure and the overall work environment.
